Notice: Sometimes an extra heavy demand will exhaust our supply of a variety, especially late in the Spring and should it happen we are sold out on any variety ordered, may we substitute a variety of more value?

Yes ☐ No ☐

Before You Order . . .

Orders will be filled in the order in which they are received so you will benefit by placing your order early. No orders will be shipped before March 21, but your order will reach you in time for planting.

Orders of \$5.00 or more will be shipped prepaid. On orders of less than \$5.00, however, please add 30 cents to help defray the cost of packing and postage. If you wish your order sent by Special Delivery mail, an additional remittance of 35 cents will be necessary. We prefer cash with your order and discourage C.O.D. orders as they are an added expense to you.

Our sincere thanks for your nice orders and encouraging letters during the past year. We will be pleased to serve you to the best of our ability again this season.

Sincerely,
(Mrs.) MARY E. TATROE

OUR GUARANTEE . . .

We guarantee our roots to be true to name and of highest quality. If stock is not satisfactory when received, return same within three weeks and replacement will be made or your money will be refunded, as you request. Because of conditions beyond our control, we cannot be responsible for growing failures after stock is planted.

Our roots are state inspected. Out of state orders will bear a certificate of inspection.

VISITORS WELCOME . . .

Our show gardens are located on the corner of Walker Road and Three Mile Road, two and one-quarter miles north of the West Leonard St. city limits of Grand Rapids. Call and get acquainted.

CLASSIFICATION OF DAHLIAS

FD - Formal Decorative; ID - Informal Decorative; IC - Incurved Cactus; StC - Straight Cactus; SC - Semi-cactus; Peo - Peony; Ba - Ball; Pom - Pom Pons; Min - Miniatures.

PLANTING SUGGESTIONS . . .

Roots should be planted in trenches or holes four inches deep in heavy soil and six inches deep in sandy soil. The roots should be laid down flat (not on end) and covered with two inches of soil. As the plant develops, more soil should be added. Where drainage is poor, roots should not be planted this deep and a furrow should be kept open between rows to facilitate drainage in wet weather. The ground should be dry and warm in the spring before plantings are begun.

ROLL OF HONOR DAHLIAS FOR 1955
